1. The Theodor Bergmann K.G and the Orion Metallwarenfabrik, munition factories, are situated on the road from Bernau (Z96) to Wandlitz, at a point about 3.5 kms. from where the road leaves Bernau.

2. These factories, when under the Germans, produced ordinary 7.9 mm rifle ammunition and 20 mm airplane machine gun ammunition. The latter represented thirty per cent of the two factories' total production.

3. Both factories have been working at full capacity for the last two years. As the Soviets have not brought any new equipment to the factories, it is believed that the same types of ammunition have been produced there during the last two years as were manufactured under the Germans.

4. One of the heads of department in these factories is a German named Fricke. he has not been removed from the post he held under the Germans. 50X1-HUM
